CREATING **OPEN** AND **CONNECTED** HEALTHCARE SYSTEMS THROUGH **HL7[®] FHIR[®]**

FHIRBall members

Drive innovations in Health IT by enabling healthcare organizations to adopt true interoperability through the secure use of the Fast Healthcare Interoperability Resources (FHIR) standard.

DISCOVER FHIR EXPERTS

Discover FHIR experts and thought leaders who share common values and build interoperable solutions based on open standard FHIR APIs.

LEARN ABOUT FHIR

Let FHIR be your solution to contribute to a world with better access to healthcare data, and comply with the latest regulations.

AEGIS

Touchstone is your FHIR® Implementation Accelerator, anchoring the AEGIS Conformance Ecosystem: Industry-leading FHIR® TestScript testing engine, our WildFHIR reference implementation servers (RIs) and thousands of ready-to-run test scripts—all available 24 hours per day.

Firely

Firely is one of the creators of FHIR. We provide all the software, training and services to bring FHIR to life. Our flagship products are Firely Server, Simplifier.net, and the open source .NET SDK. We run DevDays, the premier event for the FHIR community.

1upHealth

1upHealth is a healthcare FHIR® data platform. Natively built in the cloud, our tools enable fast connections via FHIR APIs to individual and population level patient data, high quality transformation of legacy data, unmatched field-level security, and consent management with robust data governance.

Alphora

Alphora provides FHIR® and CQL® use case services and capabilities, including Clinical Quality Measures, Care Gaps, and Clinical Decision Support. The objective of Alphora is the availability of clinical practice guidelines and recommendations to all peoples.

Hevelian

Hevelian has developed an International Centre of Excellence around FHIR and Healthcare technologies, from interoperability to data quality and data integrity. We enable companies to develop their products, or implement their projects, to the highest quality standards for software development.

Health Samurai

Health Samurai helps digital health startups, healthcare providers, health plans and IT vendors to develop FHIR-based solutions with the Aidbox FHIR Platform. Aidbox is an all-in-one platform specifically designed to speed up the building and deployment of compliant and secure FHIR-first solutions.

Patient Centric Solutions

Patient Centric Solutions enables patients and providers to easily exchange data across facilities so accurate clinical data is always available when needed to inform care. PatientShare is FHIR-based and is available as both a Smart on FHIR app and as a full patient-mediated exchange solution.

HealthLX

HealthLX™ solves interoperability and data integration challenges by providing repeatable data transformations at scale. Our composable automation platform gives payers and providers flexibility to support FHIR, HL7 V2, EDI, and CCDA to automate workflows and create operational efficiencies.

Lantana

Lantana Consulting Group provides solutions to support patient care and data-driven policy by leveraging automated, standards-based healthcare information exchange to build connections between government agencies, insurance providers, technology companies, hospitals, and other healthcare entities.

Smile

Smile Digital Health’s enterprise-grade open framework enables collaboration. Our solutions help organizations adopt open standards that support an intelligent flow of data, boost efficiency, reduce costs and generate new value; leading to improved outcomes for #BetterGlobalHealth
